**THE DIFFERENCE IS
BLACK AND WHITE.**

THOMPSON GRAY

GFEB'S ANALYSIS, SUPPORT & TRAINING

When it comes to GFEBs, we've been there — and we'll show you the way.

Thompson Gray is a woman-owned small business established in July 2008 under the leadership and vision of a career civil servant who astutely identified a critical need for the U.S. Army and built a strong, growing company meeting that need.

Our highly skilled team has extensive experience in DOD budget/financial management and business processes. We provide programmatic, financial, as well as information technology support to our DOD clients with particular expertise and emphasis on GFEBs implementation and training.

We are dedicated to helping you improve performance to better serve the warfighter and our government. Our strength is in the skills, experience and work ethic of our professionals. If you need GFEBs support, call Thompson Gray. The difference is black and white.

THOMPSON GRAY

General Funds Enterprise Business System (GFEBs) ERP

Thompson Gray provides GFEBs and Financial Management support to Army Resource Management organizations. For the ASA (FM&C), our SMEs provide on-site support in six key Functional Areas.

GFEBs Tier II Functional Support and Analysis

- Receive, analyze, and recommend possible solutions to User and System problems. Review/approve testing results for break/fix/patches. Support Future Increment Integration. Perform Master Data Maintenance.

Business Operational Support

- Support Functional Governance Board (FGB) Activities (Business Case Development, Status Tracking). Review/Update/Maintain Business Metrics and Report. Identify DOTMLPF impacts of Future Deployments. Develop strategy to address DOTMLPF impacts of future deployments.
- Assess Risk Management Plans.
- Manage Audit Support (FISCAM, FIAR and FAR). Support audit reviews + responses.

Strategic and Functional Training Support

- Develop Command Direct Support & FMSOC Strategy, Plan and Standards.
- Develop all Training Design & Strategy associated with Training products/artifacts (i.e. Job Aids, DCOs).
- Manage Training Review & Approval. Perform End User and refresher training to Commands.
- Support the Army Financial Management School (AFMS) with the review and development of all GFEBs dL courses/products.

Business Process Support

- Support Business Process Re-Engineering and Transformation Efforts. Recommend improvements to E2E process design. Support Workforce Transformation.
- Determine Benefits Realization of proposed systems enhancements/reengineering.
- Support Financial Management Command (FMCOM) with the optimization of GFEBs processes and organizational structure.
- Engage stakeholders in requirements definition and decompose business requirements from Enterprise Integration (e.g., GFEBs SA Security, Treasury).

Compliance and Audit Support

- Review, Approve and Implement GRC policy. Maintain SSO GRC Access. Review/update GRC hierarchies.
- Review/Approve SOD integrity and support compliance audits.
- Manage requirements traceability.
- Collaborate with SMEs on functional design for audit compliance.
- Support and track end user reaffirmation efforts.
- Review Perform Super User Provisioning (SPM) Review and Provision Users, maintain SPM Review Logs.

Functional Technical Support

- Analyze user requirements and, based on findings, design and maintain functional specifications for BI front-end applications.
- Support the design, code, test and documentation of all new or modified systems, applications and programs.
- Assess Integration, Develop & Approve Test Plans, and Monitor compliance. Conduct Functional User Acceptance Testing.
- Manage and Support Future Increment Integration. Develop functional designs and update user roles.

Resource Management and Financial Systems Support

Thompson Gray offers only the best training support for our clients, which includes programs like Lean Six Sigma and Continuous Process Improvement (CPI). This support covers various business initiatives and performance optimization for projects, real property, and orders (Demand Maintenance Orders, Preventive Maintenance Orders, Project Work Orders and Operational Work Orders), including call reception, technician dispatch, work assignment/tracking and customer service. Our Subject Matter Experts (SMEs) can assist in organization development, process modeling, best practices, and side-by-side or remote assistance to in-house or contracted work forces.

We also provide analysis and reporting of cost data, and quality control and assurance of processes and data.

SAP and ERP

- Document systems business logic, functions, and capabilities.
- Business Process Re-Engineering.
- Legacy-ERP Migration.
- Change Management.
- Performance data analysis and reporting.

Army Financial Accounting

- Execution management.
- Audit readiness support.
- Acquisition function support.
- Customer service.
- User training and direct support.
